## CSE 404L – Database Management Systems Lab

### LAB ASSESSMENT RUBRICS

#### DBMS LAB 07 – DBMS Lab Project (Complete Conceptual Schema)

| Dimension                                 | Exemplary                                                                                                                                 | Acceptable                                                                                                                                    | Developing                                                                                                                                   | Unsatisfactory                                                                                    | Student Score<br>out of 10<br>Marks |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|-------------------------------------|
|                                           | 10                                                                                                                                        | 8                                                                                                                                             | 6                                                                                                                                            | 4                                                                                                 |                                     |
| Overall Impression of Lab Report          | Report is complete, well written, and organized appropriately with additional elements that enhance it.                                   | Report is complete, briefly written, and organized. Lacks additional elements.                                                                | Report is mostly complete, loosely written, and fairly organized.                                                                            | Report is incomplete, sloppy, and/or disorganized.                                                |                                     |
| Submission                                | Report is submitted on time.                                                                                                              | Report is submitted within 24 hours of due date.                                                                                              | Report is submitted within 72 hours of due date.                                                                                             | Report was more than 3 days overdue.                                                              |                                     |
| Business Rules                            | Business rules express all the required entities, attributes, relationships, and cardinalities in a precise, atomic, and distinct manner. | Business rules express most of the required entities, attributes, relationships, and cardinalities in a precise, atomic, and distinct manner. | Business rules express few of the required entities, attributes, relationships, and cardinalities in a precise, atomic, and distinct manner. | Business rules miss the detail and are incomplete. Also possibly vague, separable, and redundant. |                                     |
| Entity Description                        | All the entities are well specified with an example.                                                                                      | Most of the entities are well specified with an example.                                                                                      | Some of the entities are specified along with an example.                                                                                    | Entities are not specified properly or missing example or both.                                   |                                     |
| Entity-Relationship Diagram               | ERD is properly drawn and properly labeled covering all the business rules.                                                               | ERD is properly drawn and properly labeled covering most of the business rules.                                                               | ERD is drawn and labeled covering few business rules.                                                                                        | ERD is poorly drawn and poorly labeled failing to cover the business rules.                       |                                     |
| Enhanced ERD (scenarios where applicable) | EERD is properly drawn and properly labeled covering all the enhanced business                                                            | EERD is properly drawn and properly labeled covering most of the enhanced                                                                     | EERD is drawn and labeled covering few enhanced business rules.                                                                              | EERD is poorly drawn and poorly labeled failing to cover the enhanced                             |                                     |

|----------------------------------------|-------------------------------------------------------------------------------|----------------------------------------------------------------------------|-----------------------------------------------------|----------------------------------------------------------------------|--|
|                                        | rules.                                                                        | business rules.                                                            |                                                     | business rules.                                                      |  |
| Verbal Communication and Understanding | Answered clearly and accurately with sufficient knowledge of Database Design. | Answered clearly and accurately with average knowledge of Database Design. | Answered with limited knowledge of Database Design. | Tried to answer but failed to show any knowledge of Database Design. |  |

Marks (Scenarios where EERD NA): ( \_\_\_\_\_ + \_\_\_\_\_ + \_\_\_\_\_ + \_\_\_\_\_ + \_\_\_\_\_ + \_\_\_\_\_ )/6 = \_\_\_\_\_

Marks (Scenarios where EERD App.): ( \_\_\_\_\_ + \_\_\_\_\_ + \_\_\_\_\_ + \_\_\_\_\_ + \_\_\_\_\_ + \_\_\_\_\_ + \_\_\_\_\_ )/7 = \_\_\_\_\_

Teacher Remarks and Signature: \_\_\_\_\_

Note: By drawing ERD/EERD properly means drawing entities, attributes, relationship, and cardinalities properly and labeling each element with appropriate symbol and name.
