

Lab # 08: DBMS LAB Project – Normalized Relational Schema

OBJECTIVES OF THE LAB

This lab covers second part of DBMS Lab Project Submission that is Database Design consisting of the Normalized Relational Schema.

- *Normalized Relational Schema*
 - *Relational Schema*
 - *3NF Normalized Relations*
-

NORMALIZED RELATIONAL SCHEMA

Relational Schema is a mapping of Conceptual Schema in terms of relations. These relations are then used for the process of normalization in which various data dependencies are identified and removed step-by-step in different normal forms.

-----Task 8.1-----

Submit the Complete Relational/Logical Schema of your DBMS Project including:

1. Relational Schema: Transformation of ERD and EERD into Relations
2. Normalization: 3NF of Relational Schema
